

LDS AND TLS PARTNERSHIP

Logistical Data Services (LDS), a leading provider of innovative technology solutions for the logistics industry, has partnered with Toyota Logistics Service (TLS), one of the largest automotive logistics service providers, to enhance claims and inspection processes for finished vehicles. As part of this partnership, TLS will adopt LDS's cutting-edge technology, including their state-of-the-art finished vehicle inspection & damage estimating platform, to streamline operations and improve efficiency.

By implementing LDS technology, TLS aims to enhance its existing processes and provide its customers an unparalleled experience.

The partnership between LDS and TLS is a testament to both companies' commitment to leveraging technology to drive operational excellence and deliver optimal customer satisfaction. By joining forces, these industry leaders seek to transform the claims and inspection landscape of finished vehicles, setting new benchmarks for efficiency and accuracy.

"LDS is proud to team up with Toyota Logistics Service to provide innovative solutions and advancements in rail cargo claims and inspection," said Marc Gettemy, Vice President of Logistical Data Services. "With our extensive experience and technology expertise, we are confident in delivering exceptional value to TLS and contributing to the overall success of their operations."

The partnership between LDS and TLS marks a significant milestone for both companies, solidifying their commitment to innovation and operational excellence within the logistics industry. With their combined resources and expertise, they are poised to revolutionize how chain of custody and inspection processes are conducted, setting new standards for efficiency and customer satisfaction.

KEY HIGHLIGHTS

Expansion of the Partnership: TOYOTA Logistics Service has awarded additional locations to LDS since the launch of services, raising the total number of TLS sites utilizing LDS technology to eight. This expansion showcases TLS's trust in LDS and its confidence in its technology as a game-changer in the logistics industry.

Extensive Coverage: With rail terminals on Union Pacific and CN, LDS's technology will be integrated into the operations at significant rail hubs nationwide. Additionally, the partnership extends to ports on the West and East Coasts, maximizing the reach and impact of LDS's inspection and logistics technology.
